INDIVIDUAL NUTRITION & DEVELOPMENT PLAN

Personal Information

First Name:	**İrem**	**Last Name:**	**Özer**	**Age:**	**20**
Height:	**165 cm**	**Weight:**	**55.0 kg**	**BMI:**	**20.2**
Daily Energy Expenditure (TDEE):	**1815 kcal**	**Daily Water Need:**	**1.8 L**		

Current Anthropometrics & Body Composition

Waist:	**67 cm**	**Neck:**	**30 cm**	**Hip:**	**95 cm**
Skeletal Muscle:	**22.47 kg**	**Fat Mass:**	**13.38 kg**	**Body Fat Percentage:**	**% 24.3**

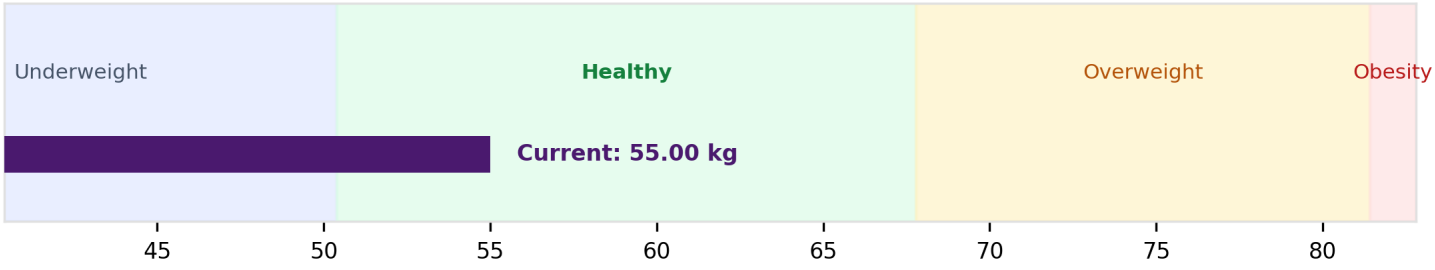

Recommended Biological Goal --> Muscle Gain / Body Recomposition
Biological Rationale: The individual is already within an optimal/fit body fat range; muscle mass can be developed while oxidizing fat without significantly altering scale weight (maintaining near maintenance calories or a very mild deficit).

Selected Goal:	**Fat Loss / Weight Loss**
Selected Activity Level:	**Light - Moderately Active (3-4 days regular exercise & walking per week)**
Selected Meals Count:	**3**

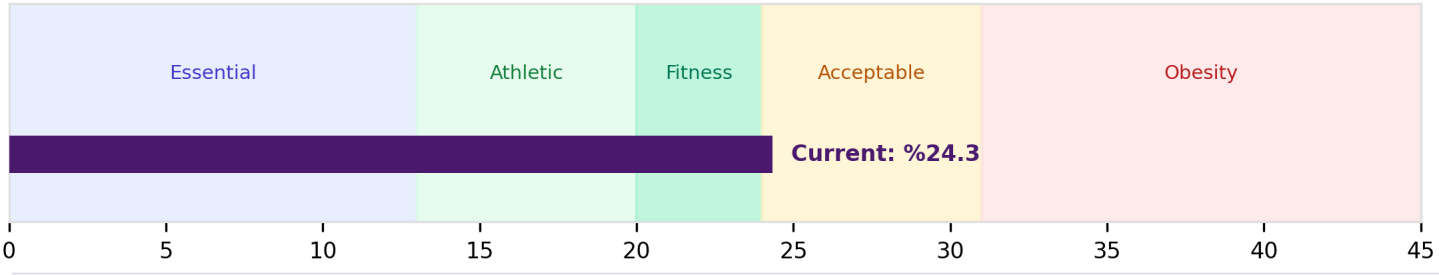

Target Outcomes After 8 Weeks

Target Weight:	**52.8 kg**	**Target Muscle Mass:**	**22.14 kg**
Target Fat Mass:	**11.51 kg**	**Target Body Fat %:**	**%21.8**

Weight and Healthy Reference Range

Body Fat Percentage and Reference Range

METHODOLOGY & SCIENTIFIC REFERENCES

* Basal Metabolic Rate (BMR) and Total Daily Energy Expenditure (TDEE) are calculated using the Mifflin-St Jeor formula.

* Body Composition and body fat percentage estimations are modeled based on U.S. Navy Body Fat Algorithms.

* Healthy weight classifications and reference intervals conform to World Health Organization (WHO) and American Council on Exercise (ACE) standards.

Daily Target Calories and Macronutrient Intake

Note: In cases where the selected goal is Weight Gain or Fat Loss, a separate plan with progressive adjustments has been structured for Month 1 and Month 2 to account for metabolic adaptation and achieve optimal outcomes. Other goals do not require phase-based recalibration.

First 4 Weeks

Calories: **1500 kcal**

Protein: **80 grams** **Carbohydrates:** **180 grams** **Fat:** **50 grams**

First 4 Weeks Meal Plan

Meal	Total Energy	Carbohydrates	Protein	Fat
Meal-1 (Breakfast)	**450 kcal**	54 grams 216 kcal	24 grams 96 kcal	15 grams 135 kcal
Meal-2 (Lunch)	**525 kcal**	63 grams 252 kcal	28 grams 112 kcal	18 grams 162 kcal
Meal-3 (Dinner)	**375 kcal**	45 grams 180 kcal	20 grams 80 kcal	12 grams 108 kcal
Snack	**150 kcal**	18 grams 72 kcal	8 grams 32 kcal	5 grams 45 kcal

Second 4 Weeks

Calories: **1400 kcal**

Protein: **80 grams** **Carbohydrates:** **170 grams** **Fat:** **50 grams**

Second 4 Weeks Meal Plan

Meal	Total Energy	Carbohydrates	Protein	Fat
Meal-1 (Breakfast)	**420 kcal**	51 grams 204 kcal	24 grams 96 kcal	15 grams 135 kcal
Meal-2 (Lunch)	**490 kcal**	59 grams 236 kcal	28 grams 112 kcal	18 grams 162 kcal
Meal-3 (Dinner)	**350 kcal**	42 grams 168 kcal	20 grams 80 kcal	12 grams 108 kcal
Snack	**140 kcal**	17 grams 68 kcal	8 grams 32 kcal	5 grams 45 kcal

Meal Timing and Critical Macro Flexibility Thresholds

* Protein Intake Flexibility: The amounts presented in the plan represent the optimal baseline. Even with daily fluctuations, protein should not drop below 64 g (0.8 g/kg threshold) to prevent lean tissue catabolism; keeping it close to 128 g supports maximum recovery.

* Meal Timing: Spacing main meals by roughly 3.5 to 4 hours stabilizes glycemic control and promotes muscle protein synthesis (MPS). Flexibility in meal timing is permissible as long as daily macro targets are hit.

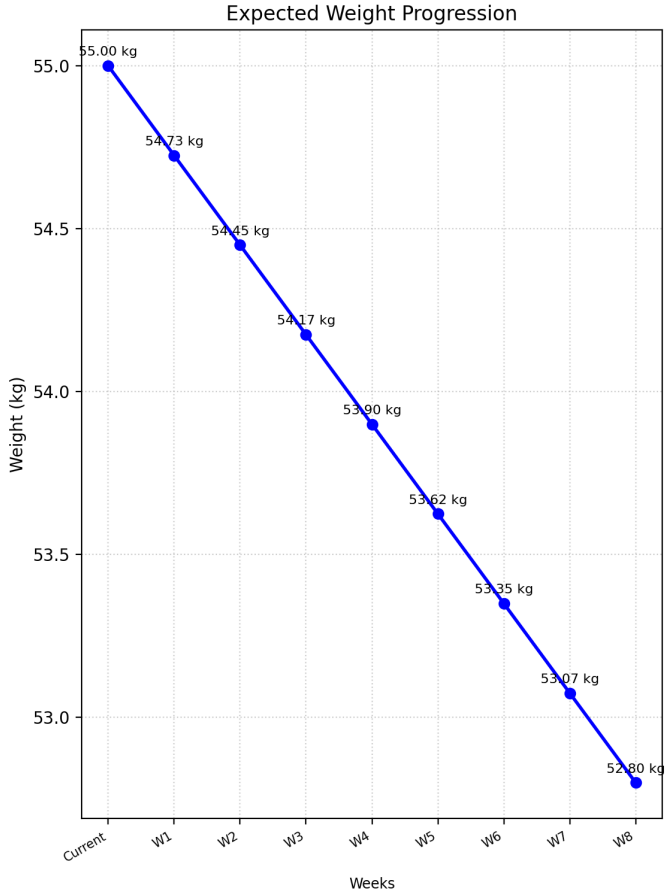

* Fluid Balance: To avoid diluting gastric acids and digestive enzymes, consume substantial liquids 20 to 30 minutes before or after main meals rather than during.

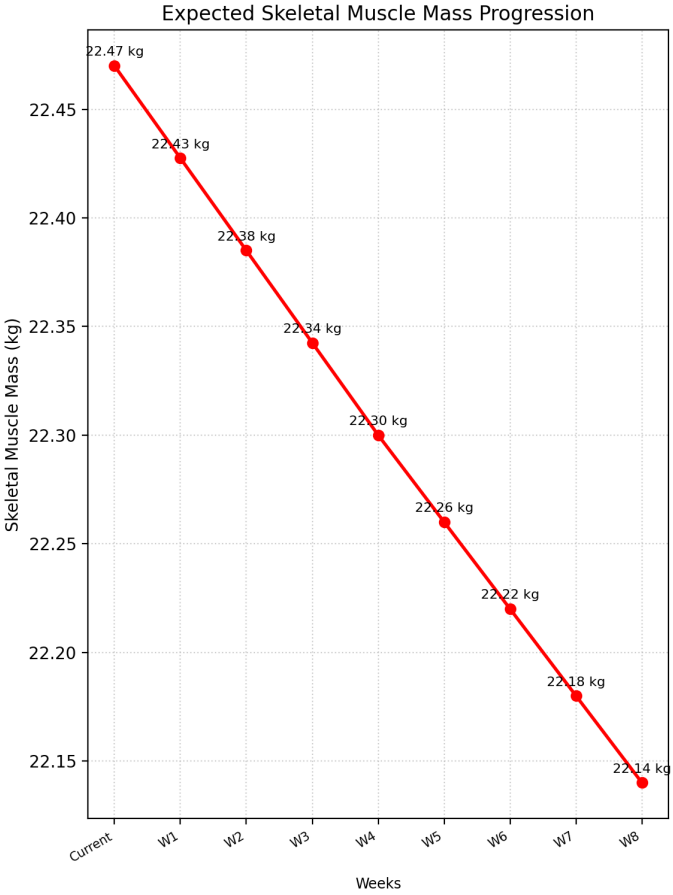

Essential Macronutrient Exchange Guide & Reference Values		
Carbohydrates & Legumes	**Protein & Dairy**	**Healthy Fats & Seeds**
Rolled Oats: 60g Carb / 370 kcal	Chicken Breast (Raw/Skinless): 23g Prt / 120 kcal	Extra Virgin Olive Oil: 100g Fat / 884 kcal
Pasta (Durum Wheat, Raw): 72g Carb / 355 kcal	Turkey Breast (Raw): 24g Prt / 115 kcal	Raw Almonds: 50g Fat / 579 kcal
Rice / Basmati (Raw): 78g Carb / 355 kcal	Lean Minced Beef / Cubes: 21g Prt / 150 kcal	Walnuts: 65g Fat / 654 kcal
Bulgur (Raw): 70g Carb / 342 kcal	Salmon / Cod / Trout: 20g Prt / 175 kcal	Raw Hazelnuts: 61g Fat / 628 kcal
Buckwheat (Raw): 71g Carb / 343 kcal	Tuna (Canned in Water): 25g Prt / 110 kcal	Raw Cashews: 44g Fat / 553 kcal
Dry Beans (Raw): 60g Carb / 335 kcal	Whole Egg (Large): 13g Prt / 143 kcal	Raw Pistachios: 45g Fat / 560 kcal
Chickpeas (Raw): 61g Carb / 364 kcal	Egg White: 11g Prt / 52 kcal	Roasted Unsalted Peanuts: 49g Fat / 567 kcal
Red / Green Lentils (Raw): 60g Carb / 340 kcal	Strained Greek Yogurt: 10g Prt / 66 kcal	Natural Peanut Butter (100%): 50g Fat / 588 kcal
Whole Wheat Bread: 45g Carb / 240 kcal	Natural Plain Yogurt: 4g Prt / 60 kcal	Tahini: 54g Fat / 595 kcal
Boiled Potatoes: 17g Carb / 77 kcal	Low-Fat Curd / Cottage Cheese: 17g Prt / 85 kcal	Sesame Seeds (Raw): 50g Fat / 573 kcal
Popcorn (Air-Popped/Oil-Free): 74g Carb / 365 kcal	Feta / White Cheese: 16g Prt / 240 kcal	Black Seed (Nigella): 35g Fat / 375 kcal
Banana (Medium): 23g Carb / 89 kcal	Kashar / Cheddar Cheese: 25g Prt / 350 kcal	Pumpkin Seeds (Raw): 49g Fat / 559 kcal
Apple (With Skin): 14g Carb / 52 kcal	Semi-Skimmed Milk (100 ml): 3.3g Prt / 46 kcal	Chia Seeds: 31g Fat / 486 kcal
Dried Dates / Apricots: 65g Carb / 270 kcal	Skimmed / Lactose-Free Milk (100 ml): 3.4g Prt / 36 kcal	Ground Flaxseeds: 42g Fat / 534 kcal
Peach (Medium): 9.5g Carb / 39 kcal	Chickpeas (Raw): 19g Prt / 364 kcal	Black / Green Olives: 11g Fat / 115 kcal
Orange (Medium): 15g Carb / 60 kcal	Dry Beans (Raw): 21g Prt / 335 kcal	Avocado: 15g Fat / 160 kcal
* Measurement & Consumption Standard: Values are referenced for 100g net raw/uncooked dry weight for solids, and 100ml for dairy products. Legumes expand 2-2.5 times in weight when boiled; use dry weight benchmarks when portioning cooked foods. You may flexibly combine your daily macronutrients using these sources.		

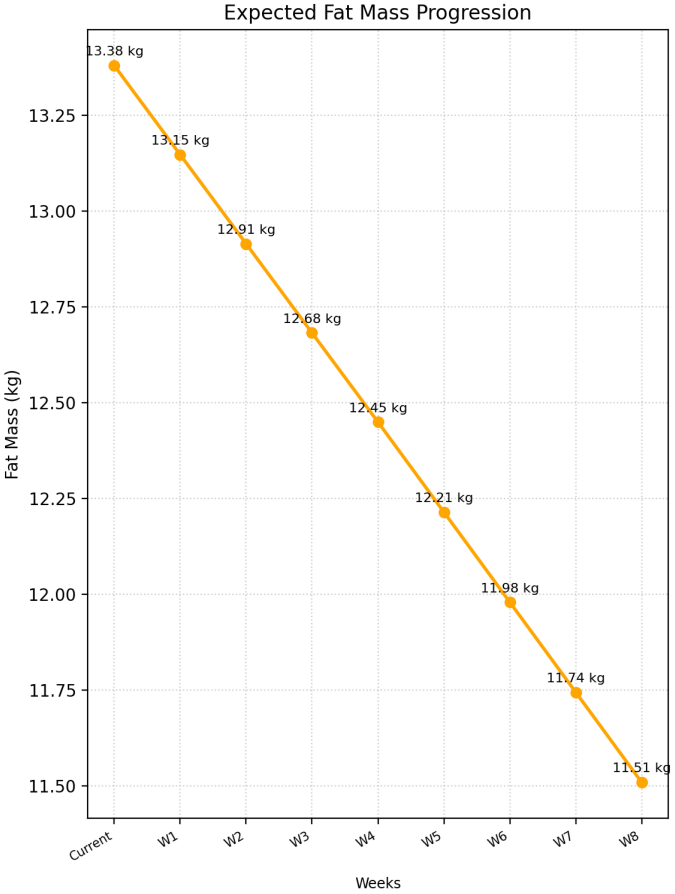

Goal-Tailored Training & Workout Plan

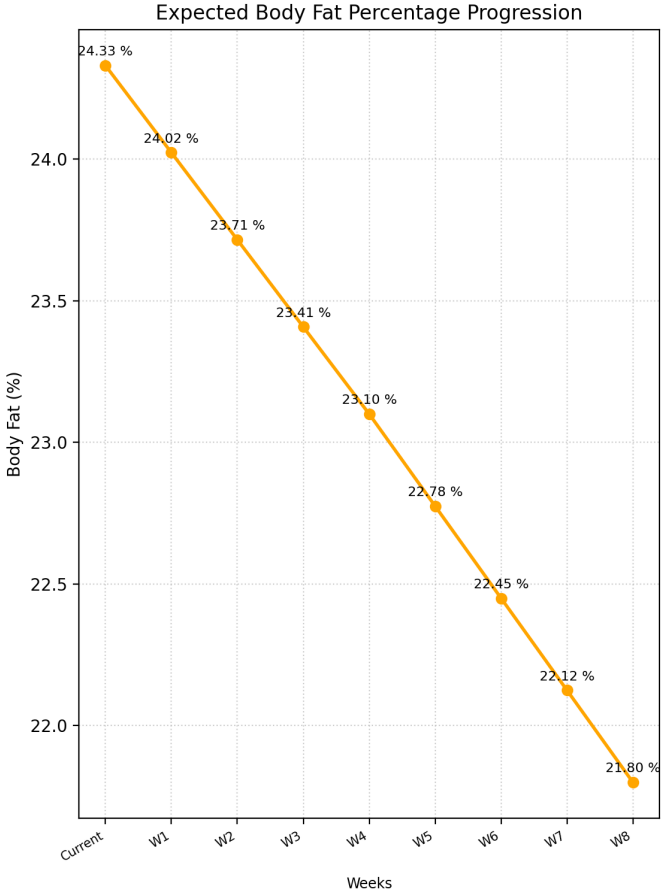

Day	Workout / Activity Details
Monday	Full-Body Foundational Strength (35 min: 5 min dynamic warm-up, 25 min chair squats, knee push-ups, glute bridges, 5 min cool-down)
Tuesday	Rest & Daily Step Goal (Light unstructured movement)
Wednesday	LISS Cardio & Core (30 min: 20 min steady-state home cardio steps, 10 min planks and deadbugs)
Thursday	Full Rest (Muscle recovery)
Friday	Lower Body & Posture-Focused Mat (35 min: 5 min warm-up, 25 min lunges, thoracic openers, glute activation, 5 min static stretches)
Saturday	Outdoor / Brisk Walk (35 min: Moderate tempo walking + 5 min leg stretches)
Sunday	Full Rest (Rest Day)

8-Week Target Progression Projection

8-Week Personal Progress & Measurement Tracking Sheet

This tracking sheet is designed to help maintain adherence throughout your 8-week journey. Record your measurements once a week on the same day, first thing in the morning while fasting and under consistent conditions.

Week	Weight (kg)	Waist (cm)	Hips (cm)	Arm/Chest	Avg Step/Water	Workout	Weekly Notes / Review
Week 1							
Week 2							
Week 3							
Week 4							
Week 5							
Week 6							
Week 7							
Week 8							

* Consistent monitoring is the cornerstone of adherence and sustainable habit formation.
